	Each <code>a</code> element must contain text or an <code>img</code> with an <code>alt</code> attribute.	WCAG 2.1 A F89 Section 508 (2017) A F89	4 pages
---	--	--	---------

Prio	Description and URL	Guideline and Line#	Count
	<p>A link name allows screen readers to voice what the links does. If there is no link text or the `alt` text is blank, screen readers have nothing to read, so read out the URL instead. To add a name do one of the following:</p> <ul style="list-style-type: none"> • Add text between the <code>a</code> element start and end tags • Add an <code>aria-label</code> attribute • Add an <code>aria-labelledby</code> attribute • Add an <code>img alt</code> attribute if the link contains an <code>img</code> element

●	<p>Identify row and column headers in data tables using <code>th</code> elements, and mark layout tables with <code>role=presentation</code>.</p> <p>Data tables allow screen reader users to understand column and row relationships. Layout tables read cells as a series of unrelated paragraphs with no tabular structure. Without <code>th</code> or <code>role</code>, screen readers apply heuristics to decide whether a table is a layout table or data table. These heuristics vary greatly between screen readers, and are affected by browser being used, window size, and font size (so the outcome is very unpredictable without <code>th</code> or <code>role</code>). If a data table has headers marked up using <code>td</code>, then change these to <code>th</code>. If a data table has no headers, add <code>th</code> elements describing each row and/or column. If the table is only used for layout add <code>role=presentation</code> to the <code>table</code> element.</p> <p>Impact on users:</p> <ul style="list-style-type: none"> • JAWS Reading: Treats tables without <code>th</code> and <code>role</code> as layout tables if the table contains cells above or below certain pixel sizes. This measurement is affected by browser window size, browser font size, and the browser used. • NVDA Reading: Applies a layout table heuristic to tables without <code>th</code> and <code>role</code> which varies 	<p>WCAG 2.1 A F91 Section 508 (2017) A F91</p>	5 pages
